Paracetamol Drug Monograph & Technical QC Report

Document status: Fictional training sample. All product, batch, company, and test information is synthetic.

1. Chemical & Core Profile

Paracetamol (also called acetaminophen) is listed here as a analgesic and antipyretic. The example product is a 500 mg per tablet tablet. This narrative is synthetic and included to test extraction from prose.

Attribute	Specification / Value
Generic name	Paracetamol (INN) / Acetaminophen (USAN)
Chemical formula	C8H9NO2
Molecular mass	151.163 g/mol
Drug class	Analgesic and antipyretic
Mechanism of action	The reference text describes an effect on prostaglandin synthesis; this statement is included for extraction testing only.
Active ingredient	Paracetamol
Excipients	Microcrystalline cellulose, starch, povidone (illustrative)
Dosage form	Tablet
Strength	500 mg per tablet
Appearance	White, round, uncoated tablet (synthetic description)
Storage conditions	Store in a dry place below 25°C; protect from moisture (illustrative text)

2. Administrative & Supply Chain Identifiers

The lot is identified as NSP-26-041; the maker is Northstar Therapeutics (SYNTHETIC); the item code is NST-PAR-500. Manufactured on 2026-01-15 and best used before 2028-01-14. The test certificate is NST-COA-2026-041.

Field	Value
Manufacturer	Northstar Therapeutics (SYNTHETIC)
Manufacturing site	Unit 4, Example Industrial Estate (fictional)
Product code	NST-PAR-500
Report number	NST-COA-2026-041
QC laboratory	Northstar QC Laboratory (fictional)
Lot / batch number	NSP-26-041
Date of manufacture	2026-01-15
Use before / expiry date	2028-01-14
Testing date	2026-02-02
NDC / GTIN / GSTIN	NOT PROVIDED in this synthetic batch report

Drug name: Paracetamol

Manufacturer: Northstar Therapeutics (SYNTHETIC)

Product code: NST-PAR-500

Dosage form: Tablet

Strength: 500 mg per tablet

Batch number: NSP-26-041

Manufacturing date: 2026-01-15

Expiry date: 2028-01-14

3. Clinical Guidelines & Safety Protocol

Indications: The document describes use for mild-to-moderate pain and fever; informational sample only.

Dosage information: Clinical dosage text is intentionally not used to evaluate batch quality; refer to an authorized label for real use.

Contraindications: Example text: known hypersensitivity; source must be checked against an approved label.

Critical warnings: Example text warns against exceeding approved limits. This synthetic document is not prescribing guidance.

Adverse effects: Not specified in this batch report.

Drug interactions: Not specified in this batch report.

4. Sample Laboratory Quality Control (QC) Grid

Acceptance criteria in this synthetic benchmark are illustrative only and must not be treated as official product specifications.

Test / parameter	Method	Specification target	Observed level	Reported status
Identification	IR	Must match reference spectrum	Conforms	PASS
Assay / potency	HPLC	95.0–105.0 % w/w	99.20 %	PASS
Purity	HPLC	Not less than 98.0% w/w	99.6 % w/w	PASS
Dissolution	USP apparatus (illustrative)	Q = 80% at 30 minutes	92.4% at 30 minutes	PASS
Moisture / loss on drying	Gravimetric	Not more than 1.0% w/w	0.4 % w/w	PASS
4-Aminophenol	HPLC	Not more than 0.05% w/w	0.012% w/w	PASS

Assay result: 99.2 %

Assay acceptance range: 95.0 - 105.0 %

Purity result: 99.6 %

Purity minimum: 98.0 %

Moisture result: 0.4 %

Moisture maximum: 1.0 %

Report notes

This document is fabricated for software testing. Not for medical advice, batch release, or regulatory decisions.
