Paracetamol Drug Monograph & Technical QC Report

Document status: Fictional training sample. All product, batch, company, and test information is synthetic.

1. Chemical & Core Profile

Paracetamol (also called acetaminophen) is listed here as a analgesic and antipyretic. The example product is a 500 mg per tablet tablet. This narrative is synthetic and included to test extraction from prose.

Attribute	Specification / Value
Generic name	Paracetamol (INN) / Acetaminophen (USAN)
Chemical formula	C8H9NO2
Molecular mass	151.163 g/mol
Drug class	Analgesic and antipyretic
Mechanism of action	The reference text describes an effect on prostaglandin synthesis; this statement is included for extraction testing only.
Active ingredient	Paracetamol
Excipients	Microcrystalline cellulose, starch, povidone (illustrative)
Dosage form	Tablet
Strength	500 mg per tablet
Appearance	White, round, uncoated tablet (synthetic description)
Storage conditions	Store in a dry place below 25°C; protect from moisture (illustrative text)

2. Administrative & Supply Chain Identifiers

Field	Value
Manufacturer	Northstar Therapeutics (SYNTHETIC)
Manufacturing site	Unit 4, Example Industrial Estate (fictional)
Product code	NST-PAR-500
NDC	NOT PROVIDED
GTIN	NOT PROVIDED
GSTIN	NOT PROVIDED
Report number	NST-COA-2026-041
Testing laboratory	Northstar QC Laboratory (fictional)
Batch number	NSP-26-041
Manufacturing date	2026-01-15
Expiry date	2028-01-14
Testing date	2026-02-02

Drug name: Paracetamol

Manufacturer: Northstar Therapeutics (SYNTHETIC)

Product code: NST-PAR-500

Dosage form: Tablet

Strength: 500 mg per tablet

Batch number: NSP-26-041

Manufacturing date: 2026-01-15

Expiry date: 2028-01-14

3. Clinical Guidelines & Safety Protocol
